INDEX to Volume 71

January, 1986, pages 1-120 **February,** 121-224 **March,** 225-328
April, 329-432 **May,** 433-536 **June,** 537-640

Titles

Cosmic Masers, *Ray Norris,* 248
Discover the Southern Skies, *Glen Cozens,* I, 126; II, 237
Earth's Inconstant Rotation, The, *John Wahr,* 545
Galactic Center Update, *Anita Killian,* 255
Geostationary Satellites, *Gordon E. Taylor,* 557
Good-bye to Supermassive Stars, *R. A. Schorn,* 13
Halley Showcase, A, 559
High Road to Halley, The, *J. Kelly Beatty,* 244
How Good Is Your Observing Site? *Merle F. Walker,* 139
Inside Look at Halley's Comet, An, *J. Kelly Beatty,* 438
Iron Sun, The, *James R. Graham,* 437
Journey of the 200-inch Mirror, The, *Dennis di Cicco,* 347
Legacy of the 200-inch, The, *Richard Learner,* 349
M Stars: Supergiants to Dwarfs, *James B. Kaler,* 450
Neutron Stars in Supernova Remnants, *Frederick D. Seward,* 6
Newton, Halley, and the Comet, *Owen Gingerich,* 230
Night Brought to Numbers, *Chet Raymo,* 554
Observing Artificial Satellites, *Desmond King-Hele* and *Russell Eberst,* 457
Old Stars: Ormsby Mitchel, *Kevin J. Weddle,* 14
Origins of the Spectral Sequence, *James B. Kaler,* 129
Other Suns, Other Worlds, 135
Photographing Earth Satellites, *Paul D. Maley,* 563
Place Called Uranus, A, *J. Kelly Beatty,* 333
Portrait of a 40-foot Giant, *Brian Warner,* 253
Shooting Halley, *Dennis di Cicco,* 23
Sky-Gazer's Almanac 1986, 59
Testing Relativity with DI Herculis, *David H. Smith,* 236
Turbulent Life of E. J. Opik, The, *Patrick Moore,* 149
Ulugh Beg's Forgotten Observatory, *Ernest W. Piini,* 542
Uranus' Last Stand, *J. Kelly Beatty,* 11
Voyager Among the Ice Worlds, *Andrew Chaikin,* 338

Authors

Allen, Ed, Interocular Spacing, 99
A. M., see *MacRobert, Alan*
Beatty, J. Kelly, High Road to Halley, The, 244
Inside Look at Halley's Comet, An, 438
Place Called Uranus, A, 333
Uranus' Last Stand, 11
Bittman, Barry B., M.D., A Mobile Observatory, 622
Bortle, John E., Comet Digest, 114, 221, 323, 426, 527
Boschat, Michael E., Soviet Telescope, 515
Brewer, Marshall L., M.D., see *Hunter, Tim B., M.D.*
Briggs, John W., book review, 257
Brooks, Edward M., letter, 228
Burbidge, Geoffrey, letter, 332
Burke, James D., book review, 570
Byrd, Deborah, The Sun, Moon, and Planets This Month, 66, 174, 278, 382, 486, 592
Campbell, Donald B., and *Tor Hagfors,* letter, 4
Capen, Charles F., An Excellent Year for Mars, 594
Carter, L. J., book review, 573
Caruso, Joseph, In Pursuit of OB Associations, 110
Chafee, Francis H., M.D., letter, 229
Chaikin, Andrew, Voyager Among the Ice Worlds, 338
Church, John A., In Defense of the Doublet, 99
Coco, Mark J., Enhancing Color Photographs with Filters, 215
Cohen, I. Bernard, book review, 363
Coombs, Lee C., book review, 464
Covington, Michael A., letter, 5
Cozens, Glen, book review, 467
Discover the Southern Skies — I, 127; II, 237
de Gibaja, Jerjes H. Gil, letter, 125
Der Bagdasarian, Nicholas, Amasa Holcomb: Yankee Telescope Maker, 620
di Cicco, Dennis, Journey of the 200-inch Mirror, The, 347
Shooting Halley, 23
Ducoty, Richard, letter, 436
Dunham, David W., Lunar Occultation Highlights for 1986, 72
Planetary Occultations of Stars in 1986, 71
Dutton, Denis, letter, 436
Eberst, Russell, see *King-Hele, Desmond*
Fitzsimons, James R., letter, 229
Freeman, William H., Butcher's Method, 294
Friedman, Alan J., letter, 541
Geisert, Ted, letter, 5
Gingerich, Owen, Newton, Halley, and the Comet, 230
Gordon, Rodger W., letters, 4, 5
Graham, James R., The Iron Sun, 437
Green, Daniel W. E., letter, 5
Grice, Noreen A., letter, 540
Gwillam, Oakley B., Time Without Instruments, 516
Hagfors, Tor, see *Campbell, Donald B.*
Hannenberg, D'Arcy, Celestial Replay, 191
Harris, Clifford, Silicon Eye: A CCD Imaging System, 407
Heslop, Nancy C., letter, 541
Hess, Merrill, letter, 228
Horne, George H., When Is Easter? 294
Hornung, Helmut, Quest for High-Resolution Photography, 610
Houston, Walter Scott, Deep-Sky Wonders, 115, 218, 427, 530, 634
Huchra, John, book review, 153
Hughes, David W., book review, 256
Hunter, Tim B., M.D., and *Marshall L. Brewer, M.D.,* Making Slides from Computer Displays, 86
Jones, Eric M., book review, 575
Kaler, James B., M Stars: Supergiants to Dwarfs, 450
Origins of the Spectral Sequence, 129
Keen, Richard A., How High Is That Satellite? 462
Killian, Anita, Galactic Center Update, 255
Kimmel, Bob, Mounting Accessories for Quick Interchange, 98
King-Hele, Desmond, and *Russell Eberst,* Observing Artificial Satellites, 457
Kokesh, Judy, book review, 570
Learner, Richard, The Legacy of the 200-inch, 349
Levy, David H., Turning On to Asteroids, 503
Liller, William, Tracking a Comet, 514
Logsdon, John M., book review, 37
Lopez Alvarez, Manuel, letter, 124
Loudon, Jim, letter, 229
Lovi, George, book review, 35
Rambling Through the Skies, 57, 171, 275, 379, 483, 585
Luke, Paul, Focusers and Things, 511
MacRobert, Alan, Backyard Astronomy, 30
Identifying the Moons of Saturn, 488
Optical Double Stars, 280
Watching the Winking of Algol, 176
Maley, Paul D., Photographing Earth Satellites, 563
Maran, Stephen P., book review, 259
Marcus, Joseph, letter, 125
Marling, Jack B., In Pursuit of Planetaries, 631
Marschall, Laurence A., book review, 363
Martin, Leonard, book review, 469
Mathews, Kirk A., letter, 124
Mathias, Gerald B., letter, 124
Meeus, Jean, letter, 229
Mihalas, Dimitri, book review, 362
Miller, Freeman D., letter, 540
Mills, H. Robert, Observing Sidereal Time, 203
Minton, R. B., letter, 436
Monda, Richard, letter, 541
Moore, Patrick, The Turbulent Life of E. J. Opik, 149
Morales, Ronald J., The NGC 5322 Galaxy Group, 526
Mosley, John, letter, 436
Review Corner, 87, 295, 502
Mumford, George S., book review, 257
Norris, Ray, Cosmic Masers, 248
O'Meara, Stephen James, Astronomy Day 1986, 297
Foundations of the AAVSO, 193
Pele's Atmospheric Creations, 89 (correction, 195)
Two Rare Displays, 90
Page, Thornton, book review, 573
Pearson, Joe, A Fold-Up Equatorial Mounting, 303
Piini, Ernest W., Ulugh Beg's Forgotten Observatory, 542
Price, Fred W., T. W. Webb and His Celestial Handbook, 400
Rasmussen, Ralph, letter, 124
Raymo, Chet, Night Brought to Numbers, 554
Redburn, Fred L., A Beeper Box To Time Observations, 307
Roddier, F., letter, 541
Rowe, Basil H., Tracking Tolerances in Astrophotography, 190
Schmidt, Richard, letter, 540
Schorn, Ronald A., Good-bye to Supermassive Stars, 13
Seward, Frederick D., Neutron Stars in Supernova Remnants, 6
Shipman, Harry, book review, 157
S. J. O., see *O'Meara, Stephen James*
Smith, David H., book review, 361
Testing Relativity with DI Herculis, 236
Smith, Harlan J., book review, 152
Sullivan, Woodruff T., III, book review, 36
Taulman, Dan, letter, 332
Taylor, Gordon E., Geostationary Satellites, 557
Telesco, Charles M., letter, 229
Vanden Bout, Paul A., letter, 229
Van Slyke, Paul B., Four-Speed 17½-inch Newtonian, 199
Velt, Kik, Making Your Own Globular Cluster, 398
Victor, Robert C., A 1986 Planet Preview, 68
Wahr, John, The Earth's Inconstant Rotation, 545
Walker, Merle F., How Good Is Your Observing Site? 139
Warner, Brian, Portrait of a 40-foot Giant, 253
Weddle, Kevin J., Old Stars: Ormsby Mitchel, 14
Wehler, Randall, Observing with an El-El Mounting, 95
Welch, Douglas L., Observing Geosynchronous Satellites, 606
Westfall, John E., letter, 4
White, Raymond E., book review, 465
Wilson, Robert E., letter, 436
Wingate, Bruce, letter, 228
Woolf, Neville J., What Causes Seeing? 140

Departments and Features

Amateur Astronomers —
AAVSO Discovers Space, 194
Amateur Briefs, 91, 195
Astronomy Day 1986, 297
Award-Winning Amateurs, 505
Foundations of the AAVSO, 193
French Space Art, 401
Pele's Atmospheric Creations, 89 (correction, 195)
Quest for High-Resolution Photography, 610
Tonight's Asteroids, 504
Turning On to Asteroids, 503
Two Rare Displays, 90
T. W. Webb and His Celestial Handbook, 400
Upcoming Meetings, 299

Astronomical Computing —
Butcher's Method, 294
Celestial Replay, 191
Making Slides from Computer Displays, 86
Making Your Own Globular Cluster, 398
Numbers To Crunch, 87
Observing Geosynchronous Satellites, 606
Planetarium Simulator, 191
Review Corner, 87, 295, 502
Tracking Satellites on Your Home Computer, 501
Tracking Tolerances in Astrophotography, 190
When Is Easter? 294

Backyard Astronomy —
Aurora, The, 30

Books and the Sky —
Astronomical Objects for Southern Telescopes, E. J. Hartung, 467
Astronomy: A Step-by-Step Guide to the Night Sky, Storm Dunlop, 35
Astrophotography: A Step-By-Step Approach, Robert T. Little, 464
Astrophotography for the Amateur, Michael A. Covington, 464
Astrophysical Techniques, C. R. Kitchin, 153
Cambridge Atlas of Astronomy, The, Jean Audouze and Guy Israel, editors, 152
Comet, Carl Sagan and Ann Druyan, 256
Constructing the Universe, David Layzer, 363
Cosmological Distance Ladder, The, Michael Rowan-Robinson, 465
Extraterrestrials: Science and Alien Intelligence, Edward Regis, Jr., 575
Far Travelers: The Exploring Machines, Oran W. Nicks, 570
Heavens and the Earth, . . . The, Walter A. McDougall, 37
Jodrell Bank Telescopes, The, Bernard Lovell, 36
Life and Death of Stars, The, Donald A. Cooke, 362
Mankind's Comet, Guy Ottewell and Fred Schaaf, 257
Masks of the Universe, Edward R. Harrison, 363
Moon and the Planets, The: A Catalog of Astronomical Anomalies, William J. Corliss, 469
Mystery of Comets, The, Fred L. Whipple, 259
Nova Space Explorer's Guide, The, Richard Maurer, 570
Observe — Comets, Stephen J. Edberg and David H. Levy, 257
Perfect Symmetry, Heinz R. Pagels, 361
Pioneering Space, James E. Oberg and Alcestis R. Oberg, 573
Skywatcher's Handbook, The, Colin A. Ronan, Storm Dunlop, and Brian Jones, 35 (clarification, 362)
Spacefarers of the '80s and '90s, Alcestis R. Oberg, 573
Space, Time, Infinity, James S. Trefil, 157
Universe Guide to Stars and Planets, Ian Ridpath with Wil Tirion, 35

Briefly Noted, 41 (correction, 265), 159, 263, 367, 471, 577

Celestial Calendar —
Calendar Notes, 74, 177, 179, 281, 387, 489, 596
Eclipses of the Sun and Moon, 384
Excellent Year for Mars, An, 594
Horizon for Our Planet Chart, A, 74
Identifying the Moons of Saturn, 488
Jupiter's Satellites, 66, 278, 382, 486, 592
Largest Asteroid, The, 177
Lunar Occultation Highlights for 1986, 72
Moon Phases and Distances, 74, 175, 279, 383, 487, 593
1986 Planet Preview, A, 68
Occultations by Halley, 385
Optical Double Stars, 280
Planetary Occultations of Stars in 1986, 70
R Leonis Minoris at Maximum, 489
Sun, Moon, and Planets This Month, The, 66, 174, 278, 382, 486, 592
Two Asteroid Occultations, 177
Watching the Winking of Algol, 176

50 and 25 Years Ago, 12, 134, 252, 402, 449, 544

Front-cover photographs —
Crescent Uranus, 329
Halley Closes In, 225
Halley: Gas and Dust, 537
Halley's Comet from Australia, 433
Northern Lights, The, 1
"Starship Arrival," 121

Gleanings for ATM's —
A. S. De Vany (1905-85), 100
Amasa Holcomb: Yankee Telescope Maker, 620
Beeper Box To Time Observations, A, 307
Focusers and Things, 511
Fold-up Equatorial Mounting, A, 303
48-inch Backyard Scope? 100
Four-Speed 17½-inch Newtonian, 199
In Defense of the Doublet, 99
Interocular Spacing, 99
Mobile Observatory, A, 622
Mounting Accessories for Quick Interchange, 98
Observing Sidereal Time, 203
Observing with an El-El Mounting, 95
Schupmann Booklet, 92
Silicon Eye: A CCD Imaging System, 407
Soviet Telescope, 515
Time Without Instruments, 516
Tracking a Comet, 514

Halley Notebook, 27, 150, 233, 344, 455, 558

Letters, 4, 124, 228, 332, 436, 540

News Notes —
"A" for STScI, An, 20
Assessing the Earth, 447
Asteroid Names, 355
Astronomical Anniversaries, August, 1985; correction to, 22
Beta Camelopardalis: A Visible-Light Burster? 19
Big Bang, The: Alive and Well, 22
Billion Light-Years of Galaxies, A, 355
Bok Globules and Star Birth, 147
Brightness and Shape of the Corona, The, 147
Canada Cancels Rockets, 446
Comet's Missing Carbon, A, 146
Constancy of Light, The, 21
Coolest White Dwarf? 21
Cosmic-Ray Course, 22
Draper Symposium, 448
Dusty Ellipticals, 445
Dutch Space Expo, 144
Eötvös Experiment Revisited, 358
ESA Expands, 148
Farthest Galaxy, The: A New Record, 20
First Map of Halley's Nucleus, A, 243
Frank Collection for Sale, 241
Gagarin: T Plus 25 Years and Counting, 358
Great Galactic Ring, The, 147
Halley Among the Stars, 553
Halley Emerges from Behind the Sun, 356
Halley Hotlines, 148
Halley on Ice, 359
Halley's Dust, 359
Heaven Can Wait, 444
IAU XIX, 448
Industry in Space, 18
Infrared View of the Orion Nebula, An, 354
IUE: A Miraculous Recovery, 145
Jets from Halley, 241
Keck Mirrors, 148
Keeping Track of QSO's, 358
Lean Times for Astronomy, 444
Lensing Galaxy Discovered, 550
Milky Way Occultations, 446
Minnesota Star Cruncher, 17
Most Rapidly Rotating Disk Galaxy, 446
NASA Administrator Charged, 148
NASA and Chrétien Awards, 19
Nature of Arp 220, The, 552
New Film for Astronomers? A, 356
New Mission Names, 354
New Observing Station in Southern Brazil, 553
New Soviet Space Agency, 144
1961v: An Extraordinary Supernova, 550
NOAO Picture Catalogue, 243
Nuclear Activity Trigger, 144
Observe with the HST! 145
Perkin-Elmer Optics Facility, 148
Photometry Symposium, 148, 445
"Planet Earth" Series, 17
Pluto's Atmosphere, 19
Processing Galaxy Images, 449
Quasar Fuzz, 553
Rapid Flare Star, A, 22
Real Asteroid Belts, The, 242
"Red Sirius": The Plot Thickens, 146
Rifts in the Milky Way, 551
Soapsuds Universe, 240
Space Powers Meet To Coordinate Halley Plans, 17
Space Shuttle Film Honored, 355
Space Shuttle Lost, 354
Spitzer Receives Prize, 148
Star Theater in the Andes, 18
State-of-the-Art Image Processing, 447
Sudbury Structure, The: An Impact Crater? 552
Supernovae of a Different Kind, 18
Supernova Remnant's Jet, A, 144
Supershells and Starbursts, 445
Super Star Cluster Found, 146
Telescope Available, 242
Third Millisecond Pulsar, 444

Observer's Page —
Comet Digest, 114, 221, 323, 426, 527
Deep-Sky Wonders, 115, 218, 427, 530, 634
Enhancing Color Photographs with Filters, 215
Halley Gallery — I, 319; II, 423
Halley Recovered, 426
Halley Showcase, 113
In Pursuit of OB Associations, 110
In Pursuit of Planetaries, 631
NGC 5322 Galaxy Group, The, 526
Observer's Notebook, 217
Sunspot Numbers, 117, 220, 323, 428, 532, 635

Rambling Through the Skies —
Darkness and Light, 171
Dipper by Any Other Name, A, 483
Future for Planetariums, A, 585
March Sky Long, Long Ago, A, 275
Points of View, 379
Winter Binocular Observing, 57

Southern Stars for . . . (current month), 170, 378, 584

Stars for . . . (current month), 58, 172, 276, 380, 484, 586

Selected Topics and Celestial Objects

This listing is not intended to be exhaustive and does not supplant the other parts of the index. For example, material in such regular features as Books and the Sky is ordinarily indexed only under the Departments and Features section.

Amateur astronomy: AAVSO, 193; Astronomy Day 1986, 297; deep-sky observing methods, 5; French, and the Paris Metro, 91; mosquito repellant, 228; Peruvian Astronomical Society planetarium, 18; preserving newspaper clippings, 229; spotlight for star pointing, 5; winter binocular observing, 57

Art: Joly space art, 401; Norcia's comet near Sun, 256; pictorial of other suns and worlds, 135; Porter's drawing of 200-inch telescope, 350

Asteroids: Eros, 503; infrared dust belts of, 242; new names, 355; observing, 503

Astrometry: "Minnesota Starcruncher" automatic plate scanner, 17

Atmospheric phenomena: "Chinese lantern" effect at sunset, 217; crepuscular rays, 217; parhelia, 359; seeing, 140; volcanic ash and Halley's comet, 228; volcano induced, 89

Auroras: engraving of January 18, 1839, 91; observing, 30; videotape of, 91

Awards: AAVSO nova, 505; Chrétien, 19; International Film and Television Festival medal, 355; NASA Public Service Medal, 19; Tuthill, 505

Clusters: brightest, 146. Globular — 47 Tucanae, 238; Omega Centauri, 238; M5, 634; M13, 635. Open — IC 2157, 217; M35, 218; NGC 752, 116; NGC 2129, 219; NGC 2158, 218; NGC 2266, 219; NGC 2304, 220; NGC 2355, 220; NGC 2395, 220

Comet Halley: 114, 221, 323 426, 527; Bobrovnikoff and the IHW, 540; daylight observations of, 125; dust production, 359; effect of volcanic ash on, 228; emergence from behind the Sun, 356; first map of nucleus, 243; from Antarctica, 359; hotlines, 91, 148; IACG and, 17; in 1910, 125; orbit, 379; Peters' 1910 plates of, 540; photographing, 23; recent photographs of, 27, 29, 113, 114, 151, 191, 221, 319, 356, 359, 423, 433, 455, 456, 527, 537, 559; spacecraft encounters with, 244, 438; stellar finder charts for, 553; tailward jets, 241; time capsules, 436

Comets (see also Comet Halley): first photos, 5; missing carbon in IRAS-Araki-Alcock, 146; of 1680, 232; Bennett 1969i, 25; Hartley-Good, 1985l, 114, 527; IRAS-Araki-Alcock, 1983d, 146; Kohoutek, 1973f, 23, 261; Thiele, 1985m, 114; West, 1975n, 24; P/Boethin, 1985n, 527; P/Giacobini-Zinner, 1984e, 114, 229; P/Shoemaker, 1986a, 527; P/Wirtanen, 1985q, 527

Computers: almanacs and catalogues for formulas, 87; calculating the date of Easter, 294; making globular clusters with, 398; making slides from displays, 86; Skyplot program, 191; star-tracking program for astrophotographers, 190; tracking satellites with, 501, 606

Constellations and asterisms: Argo Navis, 127; Asian, 124; Big Dipper mythology, 483; Crux, 128, 239; Egyptian, 483; in Southern Hemisphere, 126, 237; in 2832 B.C., 275; Orion, 57, 215, 216, 217; Scorpius, 239

Cosmology: Big Bang, 22; constancy of light, 21; cosmic masers, 248; gravitational acceleration, 358; testing relativity, 236

Earth: inconstant rotation of, 545; "Planet Earth" series, 17; Seasat photograph of, 157; Sudbury structure an impact crater? 552

Education: annual course on cosmic-ray astrophysics, 22; PBS television series, 17; opportunity at New Zealand, museum, 541; Resnik Library, 541

Galaxies: active nuclei of interacting, 144; billion-light-year chain of, 355; bubble-like distribution of, 240; digital image processing of, 449; dusty elliptical, 445; farthest, 20; gravitational lensing of PG 1115 + 08, 550; of QSO 2237 + 0305, 332; Magellanic Clouds, 126; most rapidly rotating, 446; NGC 5322 group of, 526; Arp 220, 552; IC 2196, 219; M31, 116; M51, 531; M63, 532; M65, 428; M66, 428; M95, 427, M96, 427; M105, 427; NGC 404, 116; NGC 523, 116; NGC 536, 116; NGC 670, 117; NGC 672, 117; NGC 750, 117; NGC 777, 116; NGC 1058, 550; NGC 2339, 219; NGC 2903, 427; NGC 3077, 220; NGC 3384, 428; NGC 3389, 428; NGC 3593, 428; NGC 3628, 428; NGC 3842, 428; NGC 4868, 532; NGC 4914, 532; NGC 5005, 532; NGC 5033, 532; NGC 5195, 531; NGC 5198, 532; NGC 5313, 635; NGC 5326, 635; NGC 5350, 634; NGC 5351, 635; NGC 5353, 634; NGC 5354, 634; NGC 5371, 634; NGC 5380, 635; NGC 5395, 635; PKS 1614 + 051, 21

History: 50-year anniversary of 200-inch reflector, 347, 349; Herschel's 40-foot reflector, 253; Newton, Halley, and Halley's comet, 230; "Red Sirius" enigma, 146; Ulugh Beg's 15th-century observatory, 542; Webb's *Celestial Objects*, 400

Light pollution: in New Jersey, 228

Mars: observing in 1986, 594

Meteors: Monoceros shower, 436

Milky Way: 237; galactic center, 255; gamma-ray emission around, 147; lunar occultation of center of, 446; rifts in, 551

Moon: illusion of size, 125; largest craters, 229; occultation of galactic center by, 446; Theophilus region, 464

NASA (see also Space and Spacecraft): administrator charged, 148; and industry in space, 18; and Inter-Agency Consultative Group, 17, 245; future missions renamed, 354; Public Service Medal, 19

Nebulae: infrared view of Orion, 354; observing planetary, 631. Diffuse — Coalsack, 127; Eta Carinae, 127; Orion, 357. Planetary — J900, 219; NGC 1360, 115; NGC 2371-72, 219

Observatories: Arecibo, 4; budget cuts, 444; Cincinnati, 15; Dudley, 16; new observing station in Brazil, 553; site testing for, 139; Williston, 193

Observatories, amateur and public: Highland Park, Argentina, 124; portable amateur, 622

Personal notes: Allen, M., 91; Beggs, J. M., 148; De Vany, A. S., 100; *Challenger* Seven, 354; Haas, W. H., 4; Hall, J. S., 355; Hoag, A. A., 355; Holcomb, A., 620; Holton, C. H., 195; Gagarin, Yu., 358; Gunter, J. U., 504; Kwentus, P. R., 195; Maag, R. C., 195; Mitchel, O., 14; Myers, W. W., 195; Opik, E. J., 149; Roman, N. G., 355; Spitzer, L., Jr., 148; Ulugh Beg, 542; Wahnsiedler, W. J., 195; Webb, T. W., 400; Wesselink, A. J., 355

Photography: filter enhancement of color photographs, 215; high-resolution, 610; National Optical Astronomy Observatories catalogue, 243; new use of X-ray film in astrophotography, 356

Planetariums: future of, 540, 585

Pluto: atmosphere around, 19

Pulsars: rapidly rotating, 444

Quasars: gravitational lensing of QSO 2237 + 0305, 332; nebulosity around, 553; new catalogue on, 358; PG 1115 + 08, 550

Radio astronomy: using Cray computer as image processor, 447

Saturn: observing moons of, 488

Space and spacecraft: Canada's upper-atmosphere rocket program, 446; Dutch exhibition, 144; Einstein satellite, 6; European Space Agency expands, 148; geostationary satellites, 557, 606; Giotto, 244, 438; Hubble Space Telescope observing proposals, 145; industry in space, 18; International Cometary Explorer, 244; International Ultraviolet Explorer, 145, 247, 443; Lageos, 546; Landsat transfer to private sector, 447; new Soviet agency, 144; NRAO boycotts Vega mission, 229; observing artificial satellites, 457, 501, 606; photographing artificial satellites, 563; Pioneer Venus orbiter, 442; Sakigake, 245, 443; space burial, 444; Space Shuttle *Challenger* disaster, 247, 354; Space Shuttle *Columbia* over Australia, 239; Space Telescope Science Institute, 20, 145; Vega 1 and 2 encounters with Halley, 244, 438; Voyager 2 encounter with Uranus, 11, 333, 338

Stars: Alpha Canum Venaticorum, 532; Beta Camelopardalis a visible-light burster? 19; Betelgeuse companion, 541; Chinese names, 124; coolest white dwarf? 21; DI Herculis, 236; Epsilon Aurigae ring, 436; forming from Bok globules, 147; M-type, 450; neutron, in supernova remnants, 6; OB associations of, 110; origins of spectral sequence, 129; rapid flare, 22; starbursts and supershells, 445; supermassive, 13; Theta[1] Orionis, 179

Sun: brightness and shape of corona, 147; predicting sunspot maxima and minima, 229

Supernovae: Cassiopeia A, 447; creating iron, 437: in NGC 4618, 19; new types of, 18; 1961v, 550; remnants, 6, 144

Telescopes and telescope making: "beeper box," 307; CCD imaging system, 407; comet-tracking mount alignment, 514; doublets and chromatic aberration, 99; "el-el" mount, 95, finder rings, 513; focusers and accessories, 511; folding equatorial mount, 303; Frank instrument collection, 241; Herschelian eyepiece, 621; interocular spacing, 99; "Minnesota Starcruncher" automatic plate scanner, 17; mounting accessories, 98; new Perkin-Elmer optical facility, 148; nocturnal, 203; radioactive optics, 124; Schupmann construction manual, 97; Star Instruments' 48-inch mirror, 100; stereoscopic viewer, 332; Ulugh Beg's 40-meter-radius meridian arc, 542; Soviet 3.1-inch refractor, 515; Lick 6-inch Polestar Trail, 143; Fox 6½-inch Brandon, 4; Williston 8-inch Clark, 194; Holcomb 8½-inch reflector, 621; Cincinnati 12-inch Clark, 15; Brazilian 16-inch astrograph, 553; Kitt Peak 16-inch reflector, 242; Van Slyke 17½-inch Newtonian, 199; Brazilian 20-inch photometric reflector, 553; Herschel's 40-foot reflector, 253; McDonald 82-inch, 351; Siding Spring 2.3-meter, 352; Anglo-Australian 3.9-meter, 152; William Herschel 4.2-meter, 353; Keck 10-meter, 148, 353; Jodrell Bank's 250-foot radio, 36; Arecibo 1,000-foot radio, 4

Time: telling, using the North Star and the Big Dipper, 516

Uranus: Stratoscope II photograph, 436; Voyager 2 encounter with, 11, 333, 338

Venus: orbit of, 12
